Association and Society Management International, Inc., Announces Two New Clients

January 21, 2019 (Falls Church, Va.) – Two associations, the International Ballistics Society (IBS) and the National Homeland Security Association (NHSA), recently retained Association and Society Management International, Inc. (ASMI) for specialized services. ASMI, an association management company, provides support and guidance to non-profit organizations.

ASMI will provide full event management services and produce the International Ballistics Society Annual Symposium in 2021. The IBS is concerned with promoting the science of ballistics and to provide at the highest level a means of technical interchange and experience in this field. The Annual Symposium is a primary objective of the organization in meeting its goals of technical exchange and enhancing professional opportunities through education and career development.

NHSA will depend on ASMI for conference registration services and accounting and financial management. NHSA next meets June 17-20, 2019, in Phoenix, Arizona. The conference is the annual meeting of local homeland security and emergency management professionals from the nation's largest metropolitan areas. It has become one of the best attended and most highly anticipated homeland security conferences of the year as it focuses on all emergency response disciplines at all levels of government.

"We are honored that IBS and NHSA have entrusted ASMI with management of specialized services," states ASMI Chairman Harry Buzzerd, CAE. "The addition of these groups to our client base will allow ASMI to continue to offer clients a breadth of experience and insight on best practices and continuous quality improvement."
