## ASMI Client, the American Trauma Society, Receives Safe States Partner of the Year Award

**Sept. 7, 2021 (Falls Church, Va.)** – The American Trauma Society (ATS), a client of Association and Society Management International, Inc. since 2012, was awarded the Partner of the Year Award by Safe States Alliance (SSA). The award was presented on Sept. 2, 2021 during the organization's virtual injury and violence prevention conference.

The Partner of the Year Award acknowledges the contributions of an organization or sponsor for furthering the mission of the Safe States Alliance. ATS and SSA have partnered on various activities including the Trauma Prevention Coalition, the development of the public health module of the ATS Injury Prevention Course and the Injury Prevention Professionals Symposium.

"ATS is honored to be the recipient of the Partner of the Year Award," stated ATS Executive Director Suzanne Prentiss, MPA, NRP. "We believe in our partnership with the Safe States Alliance to best prepare injury and violence prevention professionals for their work as well as to advocate for a country and a world without preventable injury. Our partnership benefits state and local injury prevention programs as they are connected to hospital-based injury and violence prevention programs with much more consistency. Through the partnership we have been able to incorporate into ATS programs more about the public health role in injury prevention. This award means a great deal to our ATS team."

ASMI President Beth Armstrong, CAE said "We are extremely proud to be part of the American Trauma Society's efforts supporting such activities and ASMI applauds ATS on its Award."

The SSA is the only national organization comprised of public health injury and violence prevention professionals representing the interests of injury prevention programs at state, territorial, local, and tribal levels. The SSA coordinates with the Centers for Disease Control and Prevention's Core State Injury Prevention Program and emphasizes essential public health competencies to provide states with the capacity to swiftly respond to existing and emerging issues.

A complete list of this year's award winners is available on the Safe States website at
